

APPENDIX VII

Census Block Equivalency Report, Plan C03

Census Block Equivalency File Report

The 2021 Congressional Map includes Census Block Equivalency Files, rather than the standard “metes & bounds descriptions.” This is done for several reasons. First, census block equivalency files are the lowest level of geography, and is therefore the most accurate for the purposes of conducting elections. Second, longitudinal and latitudinal descriptions are not readily available in the software program, Maptitude, and would take several steps to convert the shape files into polygons. This has the potential to increase errors in the files. The block equivalency files are included as follows by Congressional District:

Congressional District 1: 160010021001031, 160010021001034, 160010021001035, 160010021001036, 160010021001037, 160010021001057, 160010021001058, 160010021001059, 160010021001060, 160010021001062, 160010021001063, 160010021001064, 160010021001065, 160010021001066, 160010021001067, 160010021001068, 160010021001069, 160010021001070, 160010021001071, 160010021001072, 160010021001073, 160010021001074, 160010021001082, 160010021001083, 160010021001084, 160010021001085, 160010021001086, 160010021001087, 160010021001088, 160010021001089, 160010021001105, 160010021001106, 160010021001107, 160010021001108, 160010021001109, 160010021001110, 160010021001111, 160010021001112, 160010021001125, 160010021001126, 160010021001127, 160010021001128, 160010021001129, 160010021001145, 160010021001146, 160010021001147, 160010021001148, 160010021001149, 160010021001150, 160010021001151, 160010021002000, 160010021002001, 160010021002002, 160010021002003, 160010021002004, 160010021002005, 160010021002006, 160010021002007, 160010021002008, 160010021002009, 160010021002010, 160010021002011, 160010021002012, 160010021002013, 160010021002014, 160010021002015, 160010021002016, 160010021002017, 160010022251000, 160010022251001, 160010022251002, 160010022251003, 160010022251004, 160010022251005, 160010022251006, 160010022251007, 160010022251008, 160010022251009, 160010022251010, 160010022252000, 160010022252001, 160010022252002, 160010022252003, 160010022252004, 160010022252005, 160010022252006, 160010022252007, 160010022252008, 160010022252009, 160010022252010, 160010022252011, 160010022252012, 160010022252013, 160010022252014, 160010022252015, 160010022252016, 160010022252017, 160010022252018, 160010022252019, 160010022252020, 160010022252021, 160010022252022, 160010022252023, 160010022252024, 160010022252025, 160010022252026, 160010022253000, 160010022253001, 160010022253002, 160010022253003, 160010022253004, 160010022253005, 160010022253006, 160010022253007, 160010022253008, 160010022253009, 160010022253010, 160010022253011, 160010022253012, 160010022253013, 160010022253014, 160010022253015, 160010022253016, 160010022253017, 160010022261000, 160010022261001, 160010022261002, 160010022261003, 160010022261004, 160010022261005, 160010022261006, 160010022261007, 160010022261008, 160010022261009, 160010022262000, 160010022262001, 160010022262002, 160010022262003, 160010022262004, 160010022262005, 160010022262006, 160010022262007, 160010022262008, 160010022262009, 160010022262010, 160010022262011, 160010022262012, 160010022262013, 160010022262014, 160010022262015, 160010022262016, 160010022262017, 160010022262018, 160010022262019, 160010022271000, 160010022271001, 160010022271002, 160010022271003, 160010022271004, 160010022271005, 160010022271006, 160010022271007, 160010022271008, 160010022271009,
